providing abundance is humanity s grandest challenge this is a book about how we rise to meet it abundance for all is within mankind s grasp this bold contrarian view backed up by exhaustive research introduces the near term future

new york times bestselling author the renowned economic theorist explains how america can and must create a post fossil fuel culture to survive we can t keep doing business as usual facing a global emergency a younger generation has spearheaded a national conversation around a green new deal a movement with the potential to revolutionize society

but while the green new deal has become a lightning rod in the political sphere there is a parallel movement emerging within the business community that will shake the very foundation of the global economy in coming years key sectors of the economy are fast decoupling from fossil fuels in favor of ever cheaper solar and wind energies and the new business opportunities and employment that accompany them new studies are sounding the alarm that trillions of dollars in stranded fossil fuel assets could create a carbon bubble likely to burst by 2028 causing the collapse of the fossil fuel civilization the marketplace is speaking and governments will need to adapt if they are to survive and prosper in the green new deal jeremy rifkin delivers the political narrative and economic plan for the green new deal that we need at this critical moment in history the concurrence of a stranded fossil fuel assets bubble and a green political vision opens up the possibility of a massive shift to a post carbon ecological era in time to prevent a temperature rise that will tip us over the edge into runaway climate change with twenty five years of experience implementing green new deal style transitions for both the european union and the people s republic of china rifkin offers his vision for how to transform the global economy and save life on earth the green new deal takes a stance quite different from that of typical green new deal supporters he s interested in building factories farms and vehicles in a fossil free world asserting that the green new deal is all about infrastructure the new york times book review an urgent endorsement of efforts to remake a doomed fossil fuel economy before it s too late kirkus reviews

open innovation enabled through crowdsourcing is one of the hottest topics in management strategy today particularly striking and of vital importance to the world are the pioneering efforts to apply crowdsourcing technology and open innovation to solve social environmental and economic sustainability challenges crowdrising sets out these challenges as context and then highlights the experiences of leaders and early adopters identifies implementation guidelines critical success factors and lessons learned and finally projects where the field is going in the future with a strong focus on the applications of crowdsourcing for innovation engagement and market intelligence the book profiles the initiatives of companies ngos and technology providers using crowdsourcing to develop these solutions to global problems it addresses the key challenges impacting organizations

1 identifying more sustainable ways to design distribute transport recycle and repurpose products and 2 discovering and implementing the systems needed to transform global economic growth drive human prosperity and replenish the planet s resources

energy projects in latin america are a major contributor to economic growth worldwide this book is the first to offer a comprehensive in depth analysis of specific issues arising from energy and natural resources contracts and disputes in the region covering a wide range of procedural substantive and socio legal issues the book also includes how states have shifted from passive business partners to more active controlling players the book contains an extensive treatment and examination of the particularities of arbitration practice in latin america including arbitrability public order enforcement and the complex public private nature of energy transactions specialists experienced in resolving international energy and natural disputes throughout the region provide detailed analysis of such issues and topics including state owned entities as co investors or contracting parties role of environmental law indigenous rights and public participation issues related to political changes corruption and quantification of damages climate change renewable energy and the energy transition force majeure hardship and price reopeners arbitration in the electricity sector take or pay contracts recognition and enforcement of awards tension between stabilization clauses and human rights mediation as a method for dispute settlement in the energy and natural resources sector and different comparative approaches taken by national courts in key latin american jurisdictions the book also delivers a clear explanation on the impact made to the arbitration process by covid 19 emerging laws changes of political circumstances the economic global trends in the oil gas market the energy transition and the rise of new technologies this invaluable book will be welcomed by in house lawyers government officials as well as academics and rest of the arbitration community involved in international arbitration with particular interest in the energy and natural resources sector

bold is a radical how to guide for using exponential technologies moonshot thinking and crowd powered tools to create extraordinary wealth while also positively impacting the lives of billions a follow up to the authors abundance 2012

this book explores the role of private mining rights in the utopian imaginary of space colonisation it presents a transdisciplinary account of the new and evolving legislative frameworks that have been established in anticipation of commercial exploitation of the mineral resources of the off world frontier written in an engaging style the book investigates a novel case study in the history of capitalism and the commons the emergence of a nascent space mining industry undergirded by a contentious legislative framework in 2015 the us passed laws that would recognise the claims of us corporations to own and sell space resources this unilateral act of pre emptive law making would appear to contravene the terms of the un outer space treaty 1967 which declared that the exploration and use of outer space should be for the benefit of all mankind and not subject to national appropriation using this central dynamic between privately held mining rights and outer space as a global commons matthew johnson constructs an historical sociology of space mining from the deep historical roots of common and private property to the contemporary networks of neoliberalism that have engaged with the commercialisation of space activity the anticipatory expansion of private property claims beyond the earth both resonates with and problematises the terrain of political history such as the tensions between states and markets public law and private power the commons and exclusive property the emerging cosmopolitics of off world private property mirrors and is often explicitly embedded within neoliberal geopolitics prompting urgent questions about how we can reaffirm principles of democracy and common heritage in the international laws of earth and space this book is compelling reading for anyone interested in the social study of space law economics technology politics and property rights

provides information on the history of space exploration and the daily life of astronauts

desde los orígenes de la humanidad unos pocos privilegiados han vivido en marcado contraste con la mayoría muy pobre la opinión más común es que la distancia que separa a unos de otros es imposible de superar sin embargo la distancia se está estrechando y rápido en abundancia el empresario del espacio convertido en pionero de la innovación peter h diamandis y el galardonado escritor de temas científicos steven kotler documentan cómo el progreso en inteligencia artificial robótica computación infinita redes de banda ancha manufactura digital nanomateriales biología sintética y muchas otras tecnologías que están creciendo exponencialmente nos permitirán obtener en las próximas dos décadas unos avances muy superiores a los que hemos conseguido en los doscientos años anteriores pronto tendremos la capacidad de alcanzar y superar las necesidades básicas de cada hombre mujer y niño del planeta la abundancia para todos está a nuestro alcance en este apasionante antídoto contra el pesimismo imperante los autores exploran cómo cuatro fuerzas emergentes las tecnologías exponenciales el innovador hazlo tú mismo los tecnofilántropos y los mil millones emergentes están conspirando para resolver nuestros mayores problemas

qué pasará cuando la inteligencia artificial la robótica la biología digital y los sensores se unan a la impresión 3d el blockchain y velocidades de conexión globales de varios gigabits cómo transformarán estas convergencias las industrias tradicionales de hoy en día cómo afectará a la manera en que educamos a nuestros hijos gobernamos nuestras naciones y cuidamos nuestro planeta el futuro va más rápido de lo que crees es una guía fascinante y esclarecedora para esos próximos diez años en la que diamandis y kotler investigan cómo varias oleadas seguidas de nuevas tecnologías impactarán en nuestra vida cotidiana y en el conjunto de la sociedad con una clarividencia asombrosa para abrir ventanas que nos permiten ver los frutos de estos tiempos de aceleración diamandis y kotler nos muestran cómo pronto se reinventarán los grandes sectores económicos de nuestro planeta y cuáles serán las

increíbles oportunidades para emprendedores innovadores directivos y todo aquel que demuestre agilidad y osadía la tecnología avanza con mayor rapidez de lo que nadie hubiera imaginado y durante la próxima década experimentaremos más turbulencias y crearemos más riqueza que en los últimos cien años bienvenidos a un tiempo vertiginoso y fascinante
